

optiBPO | How to setup remote BCP session

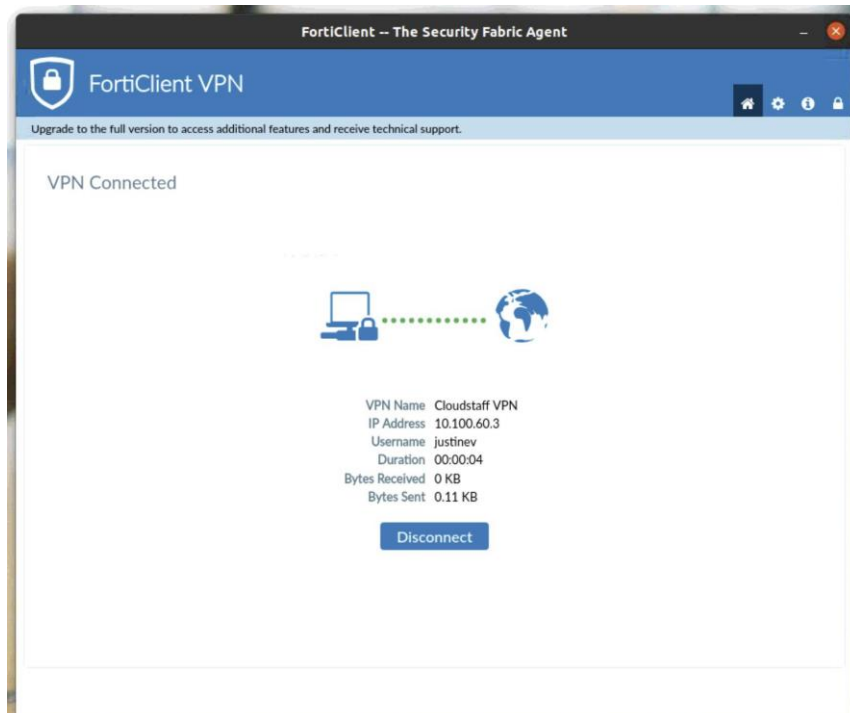

Step 1: Log on to FortiClient VPN

1. Boot your BCP PC and login to your profiles
2. Search or Check your favorites for the app named "FortiClient"

3. Click on the app to launch it Click on Connect - Settings are pre-configured
4. App should Connect and show the following screenshot:

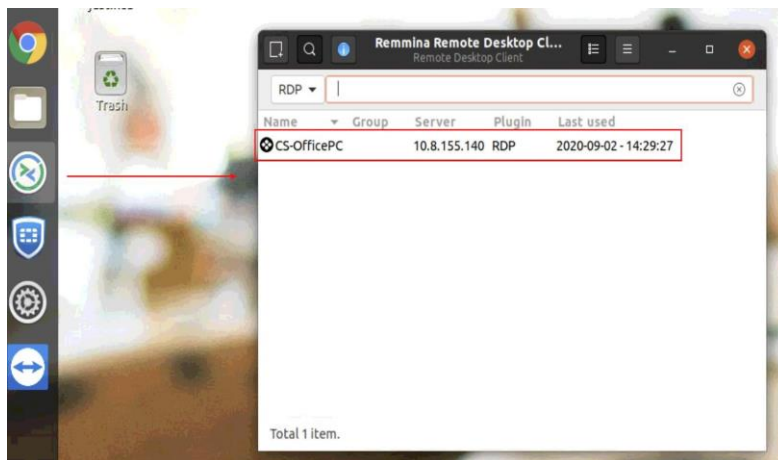

5. Do not close the app, kindly minimize it to have it working on the background you will need it for step 2

Step 2: Connect to Office PC

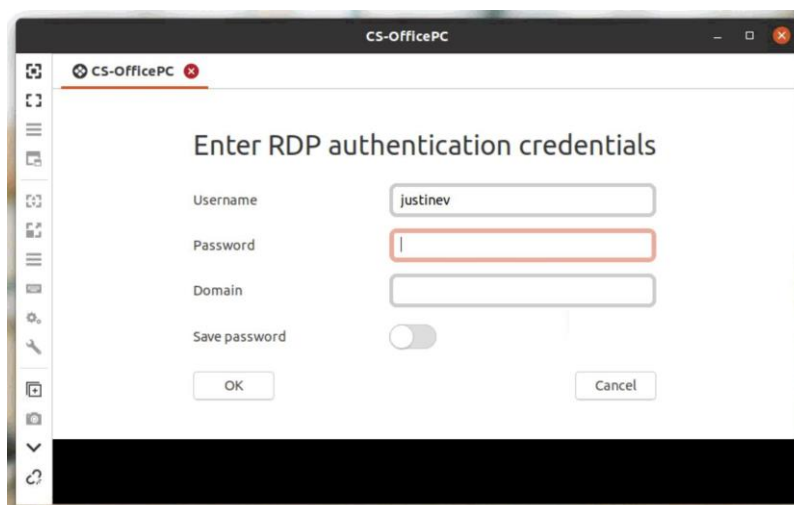

1. Once the VPN connecting to the CS network is established as shown above, connect to your Office PC via the app named "Remmina"
2. Search or Check your favorites bar for the app named "Remmina"

3. Launch the app and should see the following and double click on "CS-OfficePC":

4. RDP session should start and ask you for your credentials (password you are using on your Office PC's)

5. Connection to your Office PC should start, if there are issues kindly notify the IT team @ Ubertickets PB0922.
